Statistik ko'rsatkichlarga izoh

Sog'liqni saqlash statistikasi-statistika sohasi, quyidagilarni o'rganadi: sog'liqni saqlash tizimini rivojlantirishning miqdoriy xususiyatlari (sog'liqni saqlash muassasalari tarmog'i, ularning holati va jihozlari, tibbiy xodimlar), aholi salomatligi holatining miqdoriy xususiyatlari umuman olganda va uning alohida kontingentlari, tarqalishi, tuzilishi va umumiy aholi va ularning alohida guruhlar bilan kasallanish darajasi.

Tibbiyot muassasalari tarmog'iga kasalxona va ambulatoriya-poliklinika muassasalari, barcha mulkchilik shaklidagi onalik va bolalikni muhofaza qilish muassasalarining tez tibbiy yordam muassasalari kiradi.

Yotoq fondi-ushbu hudud aholisiga xizmat ko'rsatish uchun mo'ljallangan statsionar davolash-profilaktika muassasalarining (kasalxonalar, tug'ruqxonalar, shifoxonalar, ixtisoslashtirilgan dispanserlar va boshqalar) yotoqlari majmui. Tibbiy ixtisoslashuv bo'yicha aholining barcha yotoq va yotoq bilan ta'minlanishi, qoida tariqasida, aholining 10 ming kishiga to'g'ri keladi.

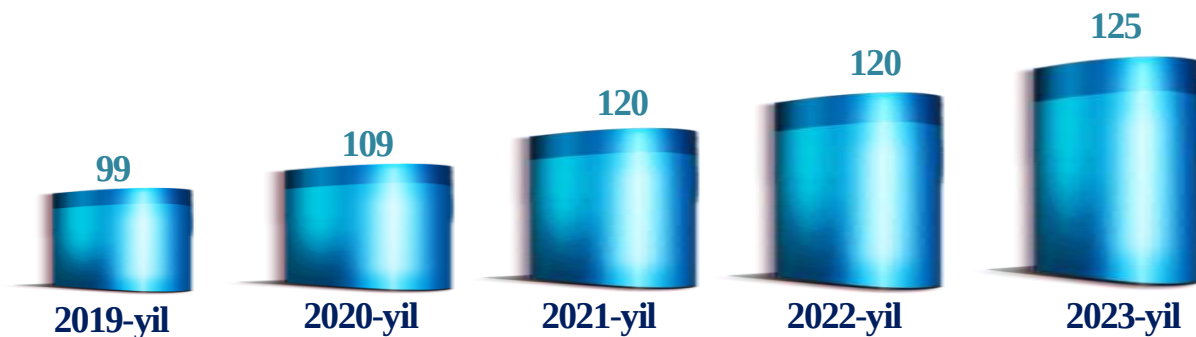

Shifokorlarning umumiy soniga yil oxirida tibbiyot, sanitariya tashkilotlari, ijtimoiy ta'minot muassasalari, tibbiyot ilmiy-tadqiqot institutlari, shuningdek kadrlar tayyorlash muassasalarida va boshqalarda ishlaydigan oliy tibbiy ma'lumotga ega bo'lgan barcha shifokorlar kiradi.

O'rta tibbiyot xodimlarining umumiy soniga tibbiyot va sanitariya tashkilotlari, ijtimoiy ta'minot muassasalari, maktabgacha ta'lim muassasalari, maktablar, bolalar uylari va boshqalarda ishlaydigan o'rta tibbiy ma'lumotga ega bo'lgan barcha shaxslar (tish shifokorlaridan tashqari) kiradi.

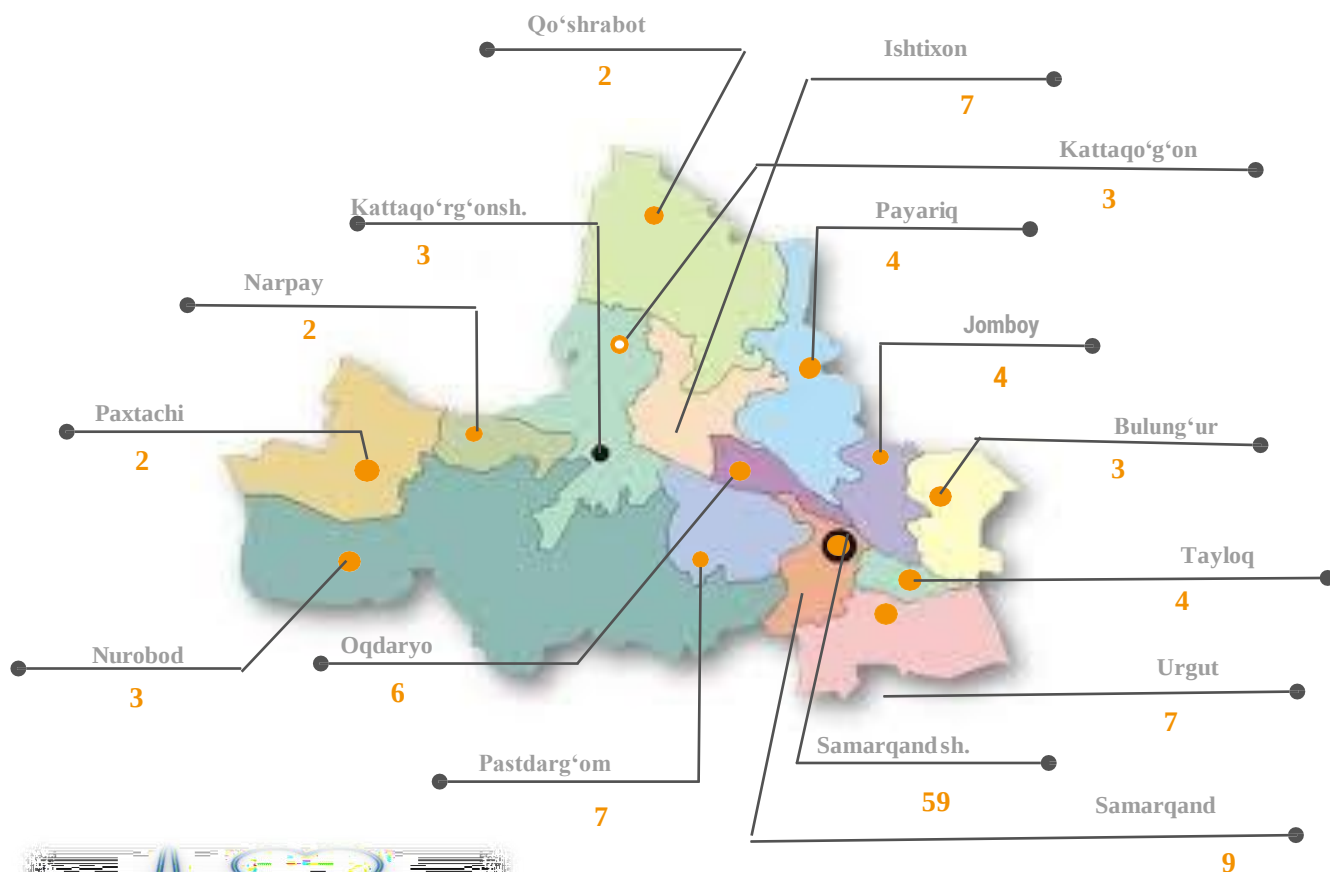

Ushbu yilda kasallik turlari bo'yicha birinchi marta tashxis qo'yilgan bemorlar (holatlar) soni kasallanish ko'rsatkichini tavsiflaydi. Kasallik darajasi bemorlar sonining nisbati bilan belgilanadi

birinchi marta tashxis qo'yilgan holda doimiy aholining o'rtacha yillik soniga.
